## Allowable Subject Matter

- 2. Claims 1-20 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: prior art does not teach in combination with the other limitations of the independent claims the method and the apparatus for practicing said method, comprising a flow conduit having one inlet and one outlet, and two selectable flow paths, one of them comprising a heat exchanger. Regarding claim 10, patentable weight was given to "(micro)turbine engine" (the patentable weight was given to "turbine"), because it breathes life and meaning into. the claim through the fact that its flow of exhaust gas is later claimed in the body of the claim. In other words, the claimed "exhaust gas" must originate from a turbine engine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
